Fagor America Introduces NEW Tall Tub Dishwasher

Lyndhurst, NJ - Fagor America is introducing a new dishwasher model to complement its existing line of major appliances. The new Energy Star rated dishwasher's tall tub interior provides the capability to accommodate items that are typically too big to fit into a standard dishwasher tub.

The additional benefit of this tall tub is the flexibility to accommodate a large load capacity in the same footprint as a standard dishwasher. The tall tub will hold the maximum number of place settings while occupying a standard dishwasher installation cutout in the kitchen.

The dishwasher is also equipped with an **eco-sensor** that monitors water quality and adjusts consumption accordingly, saving up to 25% of water in each wash. The eco-sensor measures the level of soil in the wash water and fills the tub with fresh water only when it is necessary. It helps to reduce water consumption, energy used to heat the water, and cycle time. Not only are you cleaning your dishes but saving money and time!

The **alternating wash** feature optimizes water and energy consumption due to the sprinklers that work alternatively making it a much more efficient wash. The Fagor dishwasher is so quiet, you'll hardly notice when it is working (45dB(A)). This is due to the combination of the alternating wash function, an insulated interior, and a seamless inner tub.

The **dual zone** option allows you to choose the use of only the upper rack, the lower rack or both at the same time. Dual zone allows for a flexible wash to meet your particular needs while conserving valuable resources.

The **perfect drying system** absorbs the steam/humidity generated by the washing and condensates it in a side compartment to be drained to the main line afterwards. The end result is no steam when you open the door at the end of the cycle, preventing damage to kitchen cabinetry. With safety in mind, the tall tub has internal and external sensors that cut the water supply if a leak is detected.

Additional features and controls include an a programmable time delay up to 9 hours, 10 wash cycles, an end-of-cycle signal, water softener, adjustable top rack and a digital display.

Suggested Retail Price for the new tall tub dishwasher is \$1619.00 USD.
